

Director Direct Box

What it does:

Converts audio: line level to mic level

The input is stereo

Both outputs are mic level

Inst: setting for plugging an instrument directly in to box

Amp: for plugging in from an amp

Flat: output the signal as is

Filter: can remove high-end hiss from signal

Isolation Transformer

Can take a signal in and route it out multiple ways

Takes the signal for our use while allowing signal to be used by original user

Use the Ground Lift to remove ground hum

Caused by plugging audio sources into different power circuits

Having cables running 16" parallel with power cables
